ABOUT OCTOPUS

Octopus Yachting is a yacht management company that started its operation in whole in 2015 by Kyriakos Markou, growing its fleet year by year by making yacht sales, maintenance and chartering.

The Octopus team was also getting stronger in the base operation, sales and administration in a way and pace that maintains the quality of the offered services in premium level and at the same time building trusted and long-lasting relationships with its partners.

Through its increasing success in all aspects of its activities, Octopus has managed to build a solid reputation throughout the yachting sector's professionals in regards of seamanship, integrity and trust.

The challenging 2020 year led the company in changes of administrative operation but not in terms of values and prospect, adding even more yachts and delivering the same standards securing its guests' well being.

Investing in the company's smoother administration and its people, Octopus Yachting continued to expand to 3 yacht charter bases around Greece in total, resulting happy guests, happy partners and happy boat owners.
